India's External Debt as at the end of June 2021

The stock of external debt at end-June 2021 as well as revised data for earlier quarters are set out in [Statements I \(old format\)](#) and [II \(IMF format¹\)](#). The major developments relating to India's external debt as at end-June 2021 are presented below.

Highlights

- At end-June 2021, India's external debt was placed at US\$ 571.3 billion, recording an increase of US\$ 1.6 billion over its level at end-March 2021 ([Table 1](#)).
- The external debt to GDP ratio declined to 20.2 per cent at end-June 2021 from 21.1 per cent at end-March 2021.
- Valuation gain due to the appreciation of the US dollar *vis-à-vis* Indian rupee was placed at US\$ 1.7 billion. Excluding the valuation effect, external debt would have increased by US\$ 3.3 billion instead of US\$ 1.6 billion at end-June 2021 over end-March 2021.
- Commercial borrowings remained the largest component of external debt, with a share of 37.4 per cent, followed by non-resident deposits (24.8 per cent) and short-term trade credit (17.4 per cent).
- At end-June 2021, long-term debt (with original maturity of above one year) was placed at US\$ 468.8 billion, recording an increase of US\$ 0.2 billion over its level at end-March 2021.
- The share of short-term debt (with original maturity of up to one year) in total external debt increased marginally to 17.9 per cent at end-June 2021 from 17.7 per cent at end-March 2021; however, the ratio of short-term debt (original maturity) to foreign exchange reserves declined to 16.8 per cent at end-June 2021 (17.5 per cent at end-March 2021).
- Short-term debt on residual maturity basis (*i.e.*, debt obligations that include long-term debt by original maturity falling due over the next twelve months and short-term debt by original maturity) constituted 44.7 per cent of total external debt at end-June 2021 (44.6 per cent at end-March 2021) and stood at 41.8 per cent of foreign exchange reserves (44.1 per cent at end-March 2021) ([Table 2](#)).

¹ The concepts set out in the IMF's *2013 External Debt Statistics (EDS) Guide* are harmonized with those of the *System of National Accounts (SNA) 2008* and the sixth edition of the IMF's *Balance of Payments and International Investment Position Manual (BPM6)* published in 2009.

- US dollar denominated debt remained the largest component of India's external debt, with a share of 52.4 per cent at end-June 2021, followed by debt denominated in the Indian rupee (33.2 per cent), yen (5.8 per cent), SDR² (4.4 per cent) and the euro (3.4 per cent).
- The borrower-wise classification shows that the outstanding government debt decreased, while non-government debt increased at end-June 2021 ([Table 3](#)).
- The share of outstanding debt of non-financial corporations in total external debt was the highest at 40.6 per cent, followed by deposit-taking corporations (except the central bank) (28.1 per cent), general government (18.7 per cent) and other financial corporations (8.1 per cent).
- The instrument-wise classification shows that the loans were the largest component of external debt, with a share of 34.7 per cent, followed by currency and deposits (25.0 per cent), trade credit and advances (17.9 per cent) and debt securities (16.9 per cent) ([Table 4](#)).
- Debt service (*i.e.*, principal repayments and interest payments) declined to 4.1 per cent of current receipts at end-June 2021 as compared with 8.2 per cent at end-March 2021, reflecting lower repayments and higher current receipts ([Table 5](#)).
