PHD CHAMBER OF COMMERCE AND INDUSTRY

PHD CHAMBER ENERGY COMMITTEE

As you may be aware that the PHD Chamber is an Apex Knowledge Chamber and has been working towards the cause of the Industry and economic growth. We have a vibrant Energy Committee, with members from all sectors of Energy industry. In our endeavour to strengthen and add more value to our Committee, we cordially invite all the relevant stakeholders from the industry to actively participate and contribute to the growth of the Energy sector for larger economic development.

ABOUT THE WORKSHOP

The metering industry in India has evolved drastically in the past few years leapfrogging from Automated Meter Reading (AMR) to smart metering / Advanced Metering Infrastructure (AMI). The National Tariff Policy released in January 2016 also provided the necessary impetus for smart metering roll out. For the government's vision of energy access for all, accountability at a citizen level must be expedited. Herein lies the role of the smart meter, the newest, and most transformative piece of technology in India's energy plans.

To further discuss the benefits, challenges and the Way Forward for Smart Metering in India, PHD Chamber Energy Committee is organizing Industry Workshop Roadmap For Smart Metering In India on May 14, 2019 (Tuesday) at Raunaq Room, PHD House, New Delhi.

Technical Session I

Smart Metering in India : Key Challenges and the Opportunities

Technical Session II

Smart Metering : Making Way To Smart Cities

“How can Smart City infrastructure be utilized for utility Smart Metering i.e. Electricity, Water and Gas”
