 Messe  
India

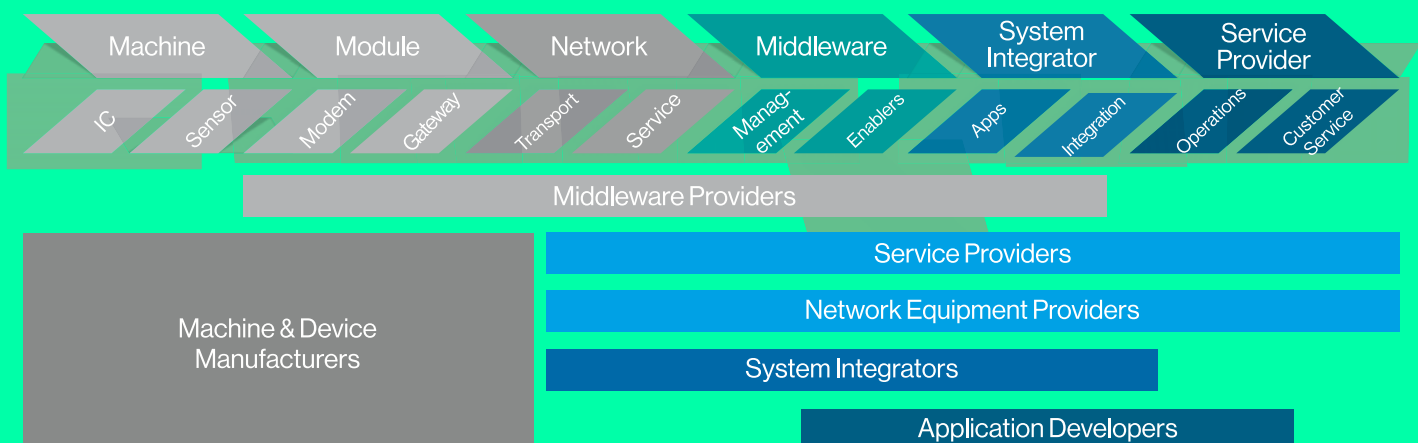

# THE FUTURE BEGINS TODAY

While 'Smart' inherently means 'connected' in IoT world, Smart Homes could have multiple meanings for different people and even different situations. A Smart Home is a user's private space and each user may have different needs. The users spend a significant amount of time at their homes and may have different expectations depending on their background, taste, affordability and availability of common services.

A Smart Home, then, may be defined as a residence or a building with equipment which can be remotely controlled and operated from any location in the world by means of Smart Devices or through a smart phone. Smart Homes comprise of Devices that provide comfort, security, convenience, energy efficiency and enhance intelligent living. The Devices communicate and interact with each other and form a connected ecosystem. Smart Home is usually understood as automated home but the actual capabilities are beyond automation. Smart Home ecosystem comprises of a set of connected gadgets with Intelligence that help them in executing the task and take necessary decisions

# THE RISE OF CONNECTIVITY

The Internet of Things (IoT) may sound like a futuristic term, but it is already here and improving our lives. Multiple machines, devices and appliances connected to the Internet through multiple networks are providing consumers and businesses with innovative new services. Moving beyond smartphones, tablets and other consumer electronics, wireless connectivity is now being added to a wide range of machines, including vehicles, household appliances, monitors and sensors.

The impact of the IoT is already evident in consumers' homes. Connected home security systems, energy meters, games consoles and other appliances are enriching the lives of consumers in many markets around the world. Connectivity gives consumers remote control of their home, enabling them to save money, access new services and enjoy greater peace of mind.

## WHY FOCUS ON SMART HOMES

**Managing all of your home devices from one place.**

**Flexibility for new devices and appliances.**

**Maximizing home security.**

**Remote control of home functions.**

**Increased energy efficiency.**

**Improved appliance functionality**

**Home management insights.**

“

By 2020, it is expected that more than 50 billion devices will be connected to the cloud and with each other in what is commonly called as the IOT!

”

**SMART HOMES = SMART LIVING**

## EXHIBITOR PROFILE

### Energy & Lighting

- Smart thermostat
- Energy manager
- Smart control radiator
- Smart meter
- Monitoring of boiler at a distance
- Smart lighting
- Smart light control
- Smart energy storage

### Appliances

- Smart televisions
- Smart toothbrush
- Smart kettle
- Smart coffee maker
- Smart air conditioner
- Smart refrigerator
- Smart washing machine
- Smart dish washer
- Smart food processors
- Robot vacuum cleaner

### Security & Control

- Smart blinds or shutters
- Alarm system
- Motion sensors
- Smart detectors
- IP camera
- Access control (digital keys)
- Smart Doorbell
- Smoke alarm & air quality sensor

### Entertainment & Connectivity

- Augmented / Virtual reality
- Cyber security
- Streaming multi room audio
- Smart TV
- Smart set top box
- Smart Amplifier & Receivers
- Home Plugs
- Routers
- Repeaters
- W-LAN sticks
- Lifestyle products

# PARTICIPATION CHARGES

## DOMESTIC EXHIBITORS

**Registration Fee:** ₹ 5000

**Participation Fee:** ₹ 15,000 per sqm (Built Up, min. 9 sqm)

₹ 14,000 per sqm (Space only, min. 24 sqm)

## INTERNATIONAL EXHIBITORS

€ 100

€ 300 per sqm (Built-up, min 9 sqm)

€ 275 per sqm (Space only, min 24 sqm)

### Health

- Personal scale
- Blood pressure monitor
- Fitness and activity tracker
- Smart Baby monitors
- Medication monitor/reminder
- Disease activity monitor
- Smart clothing

### Appliances

- Cables
- Casing, switch cabinet
- Hubs, switches
- Modem
- NAS drive
- Router, gateway
- Bluetooth, Wifi, Zigbee
- Server

### Automotive / Vehicle Technology

- Electric vehicles
- Electric vehicles infrastructure

## VISITOR PROFILE

- Architects
- EPC Consultants
- Interior designers
- Tech enthusiasts
- Suppliers and distributors
- Engineers
- Manufacturers of smart equipment
- Store managers / Product managers
- System integrators
- Service technicians

## About the Organisers:

Messe  
India

[www.messe.in](http://www.messe.in)

Messe India is a highly experienced team specialising in developing, selling, marketing and organising trade and consumer events around the country. Having a strong multi cultural background and diverse experiences is our biggest strength. We strongly believe in the importance of developing local knowledge and expertise, so all of our team members function independently in order to be sensitive and reactive to local markets.

'Thinking global, acting local' is our business mantra which enables us to build a highly commercial business. Our vision will be to deliver contacts, content and communities with the power to transform our customers' businesses.
