AJIT INDUSTRIES PVT. LTD.

India is the world's third-largest energy consuming country, thanks to rising incomes and improving standards of living. As India recovers from a Covid-induced slump in 2020, it is re-entering a very dynamic period in its energy development. India's oil demand in total primary energy is projected to increase from 233 Million ton of oil equivalent (Mtoe) in 2018 to 305 Mtoe in 2025, as per the World Energy Outlook, published by International Energy Agency. India's growing energy needs will also make it more reliant on fossil fuel imports.

Government has taken several steps to enhance exploration & production of oil and gas, give thrust on demand substitution, promote energy efficiency and conservation, capitalize untapped potential on biofuels and alternative fuels/renewables in order to reduce imports of crude oil. These include a series of initiatives such as Policy for Relaxations, Extensions and Clarifications under Production Sharing Contract (PSC) regime for early monetization of hydrocarbon discoveries, Discovered Small Field Policy, Hydrocarbon Exploration and Licensing Policy.

Against this backdrop, PHD Chamber is organizing a “**National Refining & Petrochemical Conclave 2021**” on **14th September 2021, at 11.00 A.M.** The objective of this webinar is to bring together the different stakeholders and discuss the future of refineries, deep water operations, Ease of doing business and the opportunities in India. The webinar will also provide a platform to adapt best practices and noteworthy projects.

A large number of delegates from Industry, senior officials from Central and State Governments, Technology providers, Policy Makers, Thought Leaders, Financial Institutions, etc. are expected to attend the subject Conclave.

I feel honored in inviting you to join the Conclave or nominate senior officials from your organization to attend the same. Your presence and inputs will greatly enrich the deliberations.

Regards,  
**Dr. Jatindar Singh**  
Director  
PHDCCI

## Broad Agenda Outlook

Current Scenario

Deep Water Operations

Future of Refineries

Ease of doing business

New Technologies Catalyst  
Advancements

Opportunities in India

## TARGET AUDIENCE

- National and International Oil Companies
- Oil Exploration and Production Companies
- Oil & Gas Buyers (National & International)
- CXO's of oil & petrochemicals companies
- Manufacturers & contractors of refineries
- Engineering & EPC consultants
- Refining & petrochemicals engineers
- Downstream advisor
- Refining specialist
- Head of downstream
- Service providers of the Indian and Global hydrocarbon industry.
- Corporate Venture arms of Utilities and Oil and Gas Companies Natural Gas Producers
- Pipeline Operators and manufacturers
- Oil marketers/suppliers
- Government & Public Sector Undertakings Regulatory authorities
- Petroleum Refiners and Retailers
- Energy Services Companies including efficiency services
- Energy and Resources Fund Managers
- Private Equity & Investment Banks
- Energy Lawyers and Consultants
- Big Data and Analytics Providers Bilateral and Multilateral Agencies
- State development agencies
- Port & Shipping Business
- Material technology providers
- Legal Firms & Industry Analysts
- Credit Rating Firms & Sectoral Advisory Firms
- Academic & Research Bodies & R&D personnel
- Trade Publications/Media
- Engineering and design firms
- Leak detection solution providers Meter manufacturers
- IT solution providers (SCADA, GIS, ERP, etc.)
