About the Summit

India's food processing sector is among the biggest in the world in terms of exports, growth, output, and consumption. The sector produces a variety of food items, including grains, fruits, vegetables, spices, milk and milk products, meat, poultry, fish, and plantations. It also produces alcoholic drinks. Additionally, it produces confectionary, mineral water, soy-based goods, high-protein snacks, cocoa products, and chocolates.

India's exports of Processed Food were Rs. 41,460.06 Crores in 2021-22. In 2021, the Indian food processing market had a value of 22,830 billion INR. The Indian food processing sector is anticipated to reach INR 41,835.8 billion in total value by 2027, growing at a 10% compound annual growth rate (CAGR) from 2022 to 2027.

The Food Processing sector has ensured to feed the population within the nation and worldwide. It has increased the accountability of Processed Food purchase and consumption rate by 57% in world and by 70% in India.

Considering the tremendous potential for growing the local food processing sector and attracting investment to the nation, PHD Chamber recommends to organize a one day; **FOOD PROCESSING SUMMIT 2023**: Ensuring the Food Security through Processing and Export at PHD House, New Delhi. This summit expects a vivid participation and visit of around 250 delegates and eminent speakers from various industries of the Processing Sector, to provide the deliberation on Processing Industry shaping the future of the nation and world wide, scope of increase in market acquisition within the international standards, securing food and nutritional security and challenges and overcoming hinderence of Export sector.

OBJECTIVES

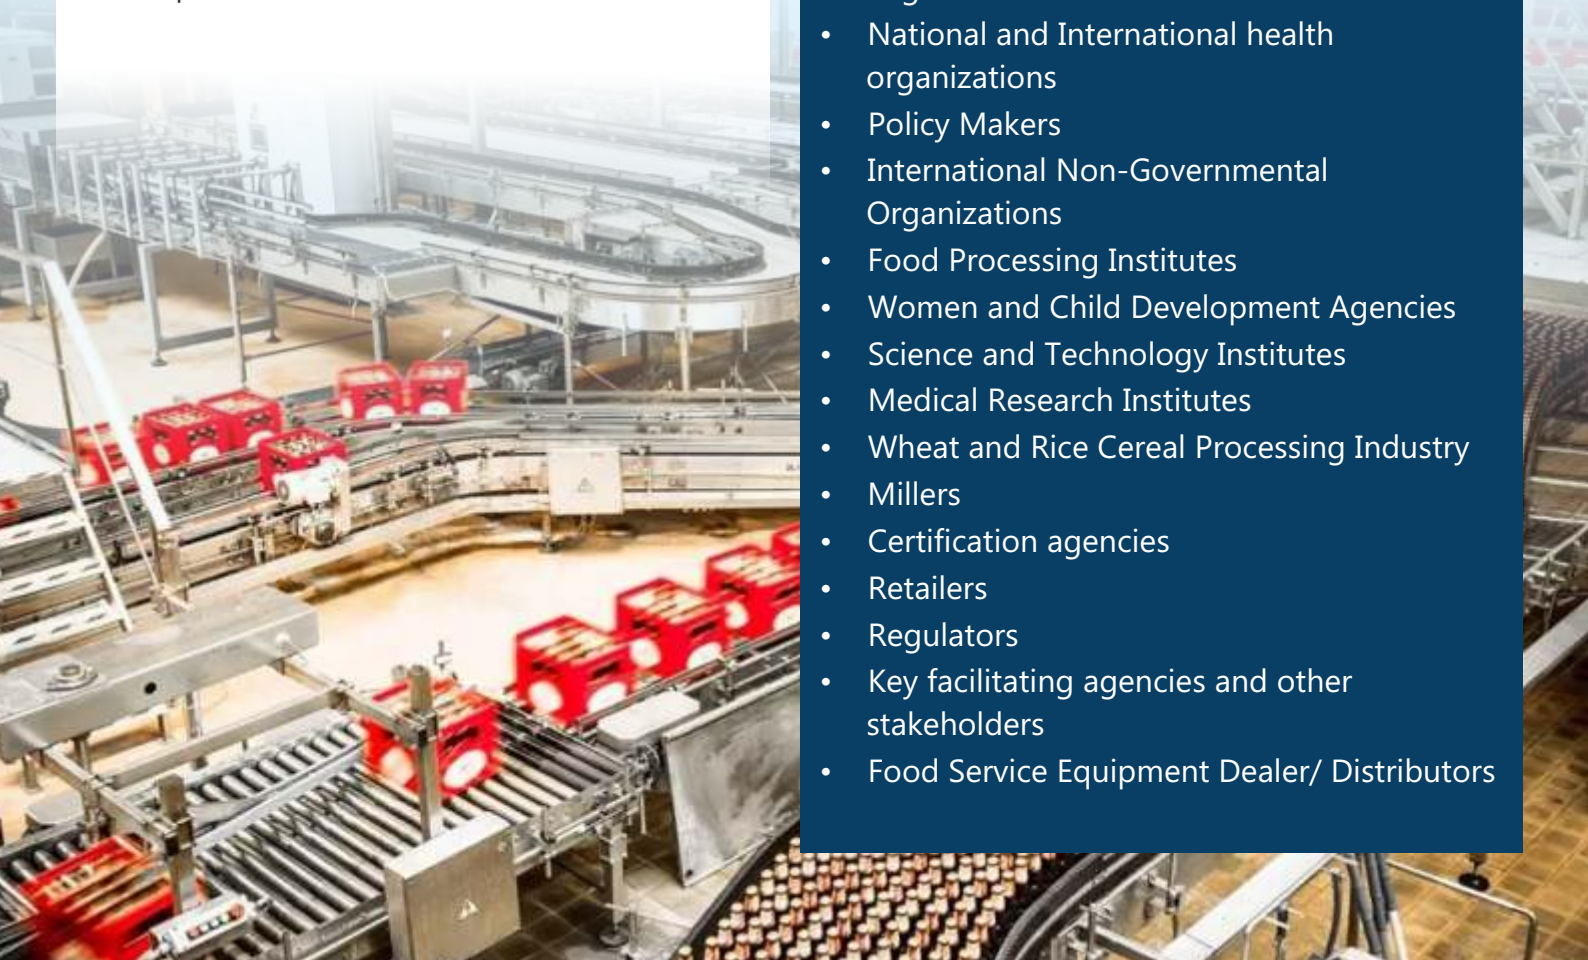

- To cultivate and circulate the produce to all in order to achieve nutritional security.
- To find better ways to provide nourishment to the most vulnerable people.
- To solve the issue of food and nutrition insecurity, with the food distribution system to be strengthened.
- To study about the export and its impact in assuring the food security in nation and worldwide.
- To discuss the various aspects of processed foods including, plant-based foods, functional foods, etc., in meeting the consumption demand.
- To discuss institutional and policy frameworks, procedures, and incentives that support suitable forms of cooperation between processing-based, millet-based and nutrition-relevant sectors.
- To create a sustainable processing chain and to increase market acceptance and knowledge of food nutrition.
- To raise consumer knowledge of the health advantages of consuming millets, supporting the expansion of the sector, henceforth increasing food consumption levels.
- To enhance the regulatory structure and look for methods to adapt it to our nation's requirements.

WHY PARTICIPATE IN THE SUMMIT?

- Platform for food businesses, international trading firms, and food technology suppliers to highlight their offerings and cutting-edge technologies
- Network with participating organizations across the food processing and export sector.
- Focused Sessions with significant industrialists and public officials. Explore the world's finest practices
