Our Master class designed to be concise yet comprehensive focusing on professional development.

ESG and Sustainability have garnered attention in recent years, with many institutional investors investing only in those companies that provide ESG performance reporting. ESG has considerations relevant to analysts and investors, consumers and employees, and has become a key topic of discussion at the Board table. This ESG and Sustainability Master- class provides an overview of an ESG framework and how it supports a company & overall risk management. It also examines each component in detail and provides insight into how they converge to impact a company and its stakeholders. This master class also discusses how to look at corporate pressures & stakeholder expectations and their impact on risk identification and business success. Lastly, this training course will examine critical considerations from the company and investor perspectives before applying theory to practice in a final case study.

This ESG and Sustainability Masterclass is suitable for any professional who would like to better understand how a company manages ESG and Sustainability challenges, in addition to:

By attending this master class participants can expect the following personal impacts:
