About VUCA

VUCA — Volatility, Uncertainty, Complexity, and Ambiguity — is a critical framework for modern leadership, introduced at the U.S. Army War College in 1987. Pioneered by thought leaders Warren Bennis (Dean of Leadership Gurus, Forbes 1996) and Burton Nanus (University of Southern California), the concept has now permeated global boardrooms and war rooms alike.

In today's healthcare ecosystem, shaped by geo-dynamics, regulatory flux, tech disruptions, and climate change, understanding and addressing VUCA is no longer optional — it's imperative.
