Boreholes Across the Island of Mauritius**

Reference: MEPU/WRC/RFI-DBH/25

Objectives

The Water Resources Commission (WRC) (under the aegis of the Ministry of Energy and Public Utilities (MEPU)) intends to embark on a drilling of boreholes campaign across Mauritius aiming at harnessing additional water resources with a view to promoting a sustainable water supply and enhancing the long-term resilience against water scarcity.

Groundwater contributes to 50% of the potable supply on the island while the remaining is derived from surface water sources such as impounding reservoirs and river intakes.

The purpose of the Request for Information (RFI) is essentially to probe the market and identify firms having the required experience and capabilities for drilling of boreholes and associated works as morefully described in the RFI document. This will allow the compilation of a pre-procurement list of contractors capable of undertaking the aforesaid works at the different locations throughout Mauritius.

Request for Information Document

The RFI document may be downloaded from the Public Procurement Portal (publicprocurement.govmu.org), the Ministry's Website, (publicutilities.govmu.org), AFD dg-market (<https://rb.gy/jrg97r>).
