EVENT AT A GLANCE:

Exhibition

The exhibition will showcase manufacturers, developers, investors, innovators and startups actively engaged in the clean energy sector. A valuable networking opportunity for industry professionals and investors, with participants from India showcasing cutting-edge technologies in the renewable energy sector, both from the public and private sectors.

Conference

The two and a half days conference focuses on future energy choices, offering participants' insights into the latest trends, technologies, and policy developments shaping the global renewable energy landscape. With 10 key sessions, and 60+ speakers, the event will cover the entire gamut of UTTAR PRADESH's renewable energy system, creating a roadmap for future-ready infrastructure.

Participation

The conference expects a diverse array of participants and presence of manufacturers, independent power producers, transmission companies, utilities, major infrastructure financing firms, think tanks, academic institutions, researchers, and policymakers from the sector

4 MEGA CO-HOSTED EVENTS

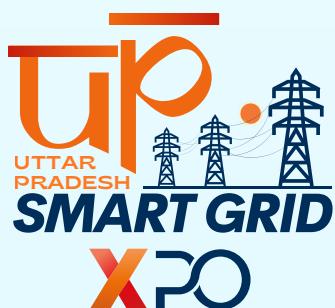

Driving the EV Revolution in Uttar Pradesh

The UP EV Expo will be a dynamic exhibition focused on the electric mobility sector in Uttar Pradesh. As the state accelerates its shift toward sustainable transportation, this expo will offer a platform to showcase the latest EV technologies, vehicles, charging infrastructure, and related solutions.

Shaping the Future of Solar in Uttar Pradesh

With the state's ambitious solar targets, UP Solar Expo will offer a unique platform to showcase the latest solar technologies, products, and solutions. This exhibition will be an excellent opportunity to connect with key stakeholders, discover new business prospects, and showcase cutting-edge solar solutions for large-scale, rooftop, and commercial & industrial (C&I) projects.

Powering the Future with Smart Energy Solutions

The UP Smart Grid Expo will focus on the latest advancements in smart grid technology and energy management solutions. The exhibition will showcase innovative products and services related to grid modernization, energy storage, smart metering, and digital infrastructure. It will bring together key industry players, including utilities, infrastructure developers, and technology providers.

Powering the Future with Advanced Energy Storage

The UP Storage Expo will highlight the latest breakthroughs in energy storage systems and solutions. The exhibition will showcase cutting-edge technologies for batteries, grid-scale storage, and hybrid systems that enhance energy reliability, efficiency, and flexibility. It will bring together leading players from across the sector, including utilities, renewable developers, storage manufacturers, and technology providers, fostering collaboration for a resilient and sustainable energy future.
