PHD CHAMBER OF COMMERCE AND INDUSTRY

ESTD. 1905

INDUSTRY 5.0 WORKSHOP

From Vision to Implementation

16th December 2026
10 a.m. – 5 p.m
PHD House, New Delhi

Everyone has the vision. Few have the plan.

Human-centric, intelligent, sustainable and resilient manufacturing: the Industry 5.0 vision is now widely accepted. The real question for Indian industry is no longer why, but how, where to start and how to scale.

This workshop is designed to close that gap. In one focused day, it takes participants from concepts to concrete decisions on technology, workforce, sustainability and financing that they can act on in their own plants.

The winners of the next decade will not be those with the boldest vision. They will be those who implement first.

The implementation gap

Policy momentum is strong. The National Manufacturing Mission, NITI Aayog's Advanced Manufacturing Roadmap and the AI-MET initiative have set the direction. On the shop floor, however, progress stalls on familiar barriers:

- Technology pilots that never move to full-scale deployment
- Workforces not yet equipped to work alongside AI and robots
- Energy-efficiency and decarbonisation targets without a costed path
- Supply chains exposed to disruption, with thin domestic value chains
- MSMEs unsure what to automate first and how to fund it

TRACK	THE VISION	WHAT YOU WILL LEARN
Human-centric manufacturing	People and machines working as partners	Cobot deployment, workforce augmentation, safety systems and reskilling plans
AI, robotics & autonomous manufacturing	AI, robotics & autonomous manufacturing Self-optimising, intelligent plants	High-payback use cases: predictive maintenance, machine vision, AI-led quality control
Sustainable & circular manufacturing	Low-carbon, resource-efficient production	Energy-efficiency measures, waste and water reduction, circular practices, green hydrogen readiness
Resilient supply chains	Disruption-proof industrial ecosystems	AI-enabled supply chains, localisation, cluster sourcing and cyber security safeguards
MSME modernisation	Every MSME part of global value chains	Affordable automation, digital maturity steps, technology financing and common facility centres

Built for doing, not just listening

- **Solve your problem**: submit a real plant challenge in advance, such as downtime, worker safety, energy use, quality inspection or efficiency, and hear solutions from domain experts.
- **MSME Adoption Clinic**: one-to-one guidance from technology experts, consultants, equipment makers on automation, digital readiness, energy optimisation and funding.
- **Know where you stand, the India Industry 5.0 Readiness Report**: benchmark findings on technology adoption, workforce readiness, sustainability, supply chain resilience and MSME transformation.

Who should attend

The workshop is built for the people who turn strategy into results on the ground:

- CEOs, COOs, plant heads and manufacturing directors who own the transformation roadmap
- CIOs, CTOs and procurement heads who evaluate and buy automation and AI
- MSME owners looking for affordable, practical first steps
- Technology providers and start-ups seeking direct access to industrial buyers
- Banks, NBFCs and investors financing industrial modernisation
- Industrial park and cluster developers building smart manufacturing ecosystems
- Policymakers, academia and skilling institutions preparing policy and talent for implementation

Reserve your workshop seat:

DELEGATE FEE	REGISTRATION
INR 5,000 + GST per participant	Mandatory; seats are limited. Last date of registration: **5th Dec 2026**
